Education

Johns Hopkins University, Bloomberg School of Public Health Expected May 2028
Master of Science (Sc.M.) in Biostatistics

University of California, Santa Barbara (UCSB) Mar 2026
Bachelor of Science (B.S.), Statistics and Data Science, Minor in Spatial Studies
Major GPA: 3.90, Dean's Honors 8x
Coursework: Probability and Statistics, Design of Experiments, Stochastic Processes, Bayesian Data Analysis, Machine Learning, Survival Analysis, Time Series, Advanced Statistical Modeling, Computational Statistics

Experience

Undergraduate Research Assistant, MOVE Lab Oct 2025 – Dec 2025
Santa Barbara, CA
Supervised by Dr. Somayeh Dodge and Yifei Liu

- Analyze large-scale GPS telemetry data and environmental layers using ArcGIS Pro, Python, and R to extract spatial-temporal movement patterns, behavioral features, and habitat interactions for tiger and leopard populations
- Build and evaluate predictive movement models incorporating machine learning and geostatistical methods to forecast movement trajectories and habitat use under varying environmental conditions

Data Science Intern, National Center for Ecological Analysis and Synthesis May 2024 – Sep 2025
Santa Barbara, CA

- Utilized R to build metadata and archive ecological, physical, and social data from over 200 NSF-funded research projects for the Arctic Data Center repository, developing workflows to optimize the data management process
- Coordinated with nationwide scientists for data acquisition and formatting, ensuring data quality through careful entry and quality assurance to facilitate open, reproducible science and support collaborative research efforts
- Worked closely with NCEAS software engineers and programmers to optimize database tools, test new site infrastructure, and provide feedback to drive improvements and streamline system performance

Data Analyst Intern, OCBridge Jun 2025 – Aug 2025
San Jose, CA

- Developed and implemented automated Python pipelines to extract, structure, and manage large-scale online datasets, enabling faster, more accurate client analytics and strategic insights
- Compiled, cleaned, and validated candidate and company data to create high-quality datasets that enhanced AI model performance and supported seamless integration into analytics and machine learning workflows

Undergraduate Research Assistant, Trugman Lab Oct 2024 – Jun 2025
Santa Barbara, CA
Supervised by Drs. Anna Trugman and Greg Quetin

- Conducted numerical modeling of field-collected data from conifer trees using machine learning models, analyzing how environmental factors impact the long-term health and resilience of forest ecosystems
- Wrote and implemented Python scripts to organize, clean, and transform complex ecological datasets, ensuring data integrity and reproducibility for subsequent statistical modeling and ecological trend analysis
- Interpreted model outputs and data visualizations to identify key environmental predictors of tree health, translating statistical findings into insights to understand forest resilience under changing climatic conditions

Undergraduate Learning Assistant, UCSB Office of Teaching and Learning Jul 2024 – Dec 2024
Santa Barbara, CA

- Guided first-year students through foundational STEM coursework by breaking down complex concepts and implementing active learning strategies to strengthen comprehension and academic performance
- Led weekly office hours for a cohort of five students, fostering an inclusive and collaborative learning environment that encouraged peer interaction, discussion, and problem-solving

Skills

Computer/Software Programs: Python, R, SQL, Base SAS, MATLAB, ArcGIS

Technologies: Version Control (Git/GitHub), Bash, Latex, RMarkdown/Quarto, Jupyter Notebook, Ecological Metadata Language, Microsoft Office
